

Limerstone Down & Cheverton Farm Results.

I had many reservations before this event, the bridleway leading up to the downs was badly rutted near the main road, the vegetation had grown dramatically since planning the courses & was the map up to standard. These concerns were not unfounded as despite Christine's and my sterling efforts to fill in the ruts two days before the event, some of you did scuff the ground coming up the hill. The farmer did level it out with chalk during the event, so made the exit fine. The vegetation did slow the green course runners down, and made the orange course harder than the orange course would normally be. Despite this, the feed-back I received at the finish was all positive with no complaints!! Everyone commented that although the courses were challenging, they enjoyed their runs on this new area & thought the map was fine. I was also very pleased to have a good turn-out, and especially glad that all the newcomers who came, completed their course and were pleased to have taken part. Hopefully we'll see them all again. All being well, we'll use the area again next spring when the vegetation is much lower & I will extend the area northward. [Watch this space]! Here are the results & see you at the quiz walk
